Supply Lauril /Sodium Lauryl Ether Sulfate

CAS 68585-34-2

Basic Info:

Appearance:	White to Yellowish Paste
CAS No.:	68585-34-2
Formula:	C14H29O5NaS
EINECS:	221-416-0
Purity:	70%
Type:	Sodium Sulfate
Specification:	170KG/220KG/1050kg IBC
Transport Package:	Drum
Origin:	China

Usage:

Sodium dodecyl ether sulfate (AES, sles) is a kind of anionic surfactant with excellent performance. It has good cleaning, emulsifying, wetting, densifying and foaming performance, with good solvency, wide compatibility, strong resistance to hard water, high biodegradation, and low irritation to skin and eye. It is widely used in liquid detergents such as meal wash, shampoo, foam bath lotion, hand sanitizer and so on. AES can also be used in washing powder and heavy scale detergent. Partial substitution of Las with AES can not only reduce the use of phosphate, but also reduce the total amount of active substances. It can also be used as a lubricant, dyeing aid, cleaning agent, foaming agent, degreasing agent, etc.
